HYDRAFACIAL

CITY
SKIN
CLINIC

Experience the ultimate in skin rejuvenation with a HydraFacial, a highly customizable treatment that suits every skin type. This gentle, pain-free facial delivers instantly noticeable results with little to no side effects. Our expert skin therapists will guide you through a relaxing treatment that detoxifies, cleanses, and exfoliates your skin, extracting impurities and smoothing away fine lines, wrinkles, and open pores.

One of the greatest advantages of HydraFacial is its unique ability to strike a perfect balance between gentle exfoliation and nourishment, providing your skin with essential nutrients without causing any long-term damage.

And the best part is that this transformative treatment can be completed in just 30 minutes, making it the perfect solution for those seeking radiant, glowing skin that fits seamlessly into even the busiest of schedules.

GENESIS

Laser Genesis stands out for its exceptional versatility, making it a suitable treatment option for individuals with diverse skin types and tones.

Laser Genesis is a revolutionary treatment that harnesses the power of gentle heat to stimulate collagen regrowth, yielding a multitude of benefits for the skin. This non-invasive procedure effectively reduces the appearance of fine lines and wrinkles, tightens pores, regulates oil production, and improves overall skin tone and texture. Additionally, Laser Genesis helps to reverse sun damage, leaving the skin with a radiant and even glow. The best part is that the treatment is incredibly comfortable, with patients often describing it as soothing and pain-free, making it an ideal solution for those seeking a relaxed and rejuvenating experience.

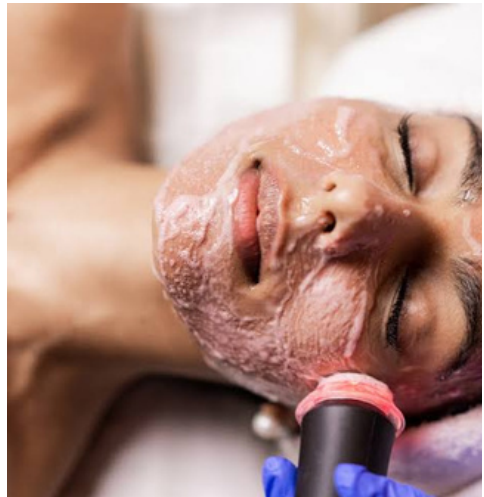

3 IN 1 FACIAL MACHINE Co2bubble+ RF+Ultrasound

OxyGeneo offers a revolutionary, all-in-one treatment that merges the advantages of microdermabrasion, facials, and skin infusions into a single, gentle, and non-invasive session. This innovative treatment is further enhanced by two specialized formulas that provide vital nutrients to enhance your skin's appearance, revealing a brighter, smoother, and more radiant complexion.

The NeoBright formula contains azelaic acid, kojic acid, and retinol to brighten and rejuvenate your skin. Meanwhile, the NeoRevive formula acts as an anti-aging therapy, containing hyaluronic acid (the active ingredient found in many dermal fillers), peptides, and retinol.

CRYO FACIAL

A cryo facial, also known as cryotherapy facial, is a professional treatment that utilizes extremely cold temperatures to rejuvenate the skin. During the treatment, a technician directs a stream of air cooled to a temperature of -200 to -300 degrees Fahrenheit onto the face, using vaporized liquid nitrogen to create a refreshing and invigorating experience.

This treatment tightens pores and blood vessels, giving the skin a smoother appearance, and reduces the appearance of fine lines and wrinkles. It also increases blood flow, leaving the skin with a healthy glow. Additionally, Cryo Facial decreases puffiness and fluid buildup, minimizing under-eye bags and puffiness all over your face. It helps to achieve a radiant complexion, leaving the skin looking smooth, bright, and refreshed.

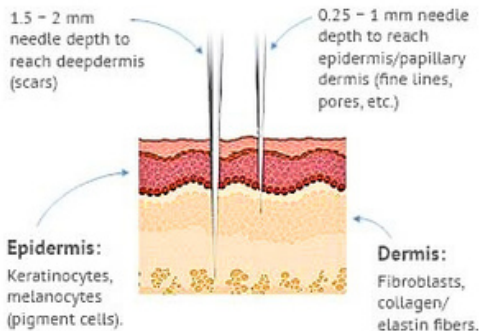

MORPHEUS

Morpheus8 is a cutting-edge, microneedling radiofrequency treatment that stimulates collagen production, tightens and firms skin, and improves the appearance of stretch marks and cellulite. This versatile treatment can be applied to various areas, including the face, neck, abdomen, arms, above the knee, and vaginal tissue. It's particularly effective in the delicate eye area, reducing under-eye bags, dark circles, and sagging skin. Additionally, Morpheus8 can be combined with dermal fillers to address tear troughs and restore lost volume and collagen, leaving the skin looking smoother, tighter, and more radiant.

MICRONEEDLING

Microneedling is a minimally invasive treatment that creates thousands of tiny microchannels in the skin using a microneedling pen. These microchannels have a dual effect: they significantly enhance the absorption of skin care products, such as serums, by up to 70%, allowing for deeper penetration and greater efficacy.

Additionally, they stimulate the skin's natural regenerative processes, triggering the production of collagen and elastin to reveal healthier, more radiant skin as the microchannels heal.

VANQUISH

Say goodbye to stubborn fat with BTL Vanquish, a non-surgical, FDA-cleared fat reduction treatment that targets problem areas such as the waist, thighs, abdomen, and flanks. This pain-free procedure uses radio frequency energy to permanently destroy fat cells, resulting in a reduction of 1 to 4 inches.

Treatment sessions are quick and convenient, lasting around 45 minutes for the stomach and waist, and approximately 1 hour for the thighs. With Vanquish ME, you can achieve a slimmer, more toned physique without surgery or downtime.

This revolutionary technology offers a pain-free, non-surgical solution to transform your core and glutes. In just four 30-minute sessions over two weeks (or six sessions for higher BMIs), it strengthens and enlarges muscle fibers, enhances definition, and lifts the buttocks. Additionally, it reduces stubborn fat and addresses post-pregnancy diastasis recti. Unlike other treatments, it simultaneously builds muscle mass while melting fat cells, all without downtime, surgery, anesthesia, or post-procedure pain medication. Say goodbye to stubborn fat and hello to defined abs and contoured physique - the ultimate body transformation which is pain-free and hassle-free!

GLASS SKIN FACIAL

The Glass Skin Facial is a luxurious, non-invasive treatment that combines the powers of HydraFacial, Pico Rejuvenation, and a nourishing skin mask to reveal radiant, luminous skin. This innovative facial is designed to address a range of skin concerns, from fine lines and wrinkles to uneven tone and texture, leaving your skin looking smooth, bright, and undeniably radiant - just like glass!

EXILIS

Exilis is a groundbreaking, non-invasive treatment that tackles wrinkles and unwanted fat deposits from head to toe. This innovative device harnesses the power of both ultrasound and radiofrequency technologies, making it a game-changer in the world of aesthetic treatments. Say goodbye to saggy skin and hello to tighter, smoother skin without the need for surgery, needles, or anesthesia. With no downtime required, Exilis is the perfect solution for those seeking a quick and effective treatment. Additionally, it can be used to complement pre and post-treatment care for invasive liposuction techniques, making it a versatile and valuable tool in the fight against aging and excess fat

TIGHT & GLOW FACIAL

Tight and Glow facial is done by DEKA Laser, which is an advanced, high-intensity laser treatment that targets deeper wrinkles and textural issues, offering a robust resurfacing solution. By creating micro-injuries, this treatment stimulates collagen production, leading to significantly smoother, stronger, tighter, and more even-toned skin. Individual experiences may vary, but results are immediate and continue to improve over several months as new collagen is generated. With no downtime required, you can return to your normal activities immediately, revealing a radiant and rejuvenated complexion

LASER HAIR REMOVAL

Laser hair removal is a revolutionary, long-term hair reduction solution that uses advanced technology to target and destroy hair follicles. Candela and Soprano are two leading laser hair removal systems that utilize cutting-edge technology to provide fast, effective, and gentle treatments. Candela's laser hair removal system uses a high-intensity light beam to target and destroy hair follicles, while Soprano's system uses a combination of laser and IPL (Intense Pulsed Light) technology to provide a more comprehensive hair removal solution. Both systems are designed to provide long-lasting results, reducing the need for frequent waxing, shaving, or tweezing.

LIPOSUCTION

VASER liposuction, also known as ultrasound-assisted liposuction is a body sculpting procedure that targets stubborn fat areas with precision and accuracy. This minimally invasive technique utilizes ultrasound waves to liquefy unwanted fat, which is then gently removed through suction, resulting in a slimmer, more toned physique. As a more precise and less invasive alternative to traditional liposuction, VASER liposuction is gaining popularity among those seeking a refined, sculpted appearance with reduced downtime and scarring

FAT GRAFTING

Facial fat grafting is a surgical procedure that restores lost volume to the face, rejuvenating your appearance. The process involves liposuction to harvest fatty tissue from one area of the body, which is then processed and injected into areas of the face that require augmentation, such as the cheeks, nasolabial folds, forehead, lips, and under-eye areas.

While facial fat grafting provides long-lasting results, approximately 60% of the injected fat is retained. To enhance fat survival, platelet-rich plasma (PRP) can be injected simultaneously, although this adds an additional cost. By harnessing your body's natural resources, facial fat grafting offers a safe and effective solution for restoring a more youthful, radiant complexion
